

# Healthcare Transparency in Quality & Pricing

The largest and most accurate data available on medical providers and negotiated prices in the USA.

We help payers, providers, plan sponsors, and members identify the best doctors at the best prices by procedure, location, network, or by provider (NPI) or health plan using actual, negotiated rates and unbiased, data-driven quality metrics through user-friendly B2B Web-based platforms or automation inside other applications (business systems or member portals).

## Provider Ranking System (PRS)

Compare unbiased provider ranking and cost information by medical procedure or specialty by region or nationally, with individual physician and hospital rankings.

## Healthcare Pricing Guide (HPG)

The first of its kind user friendly tool from the Transparency in Coverage files (TIC), revealing negotiated prices from all healthcare payers for all services to all medical providers.

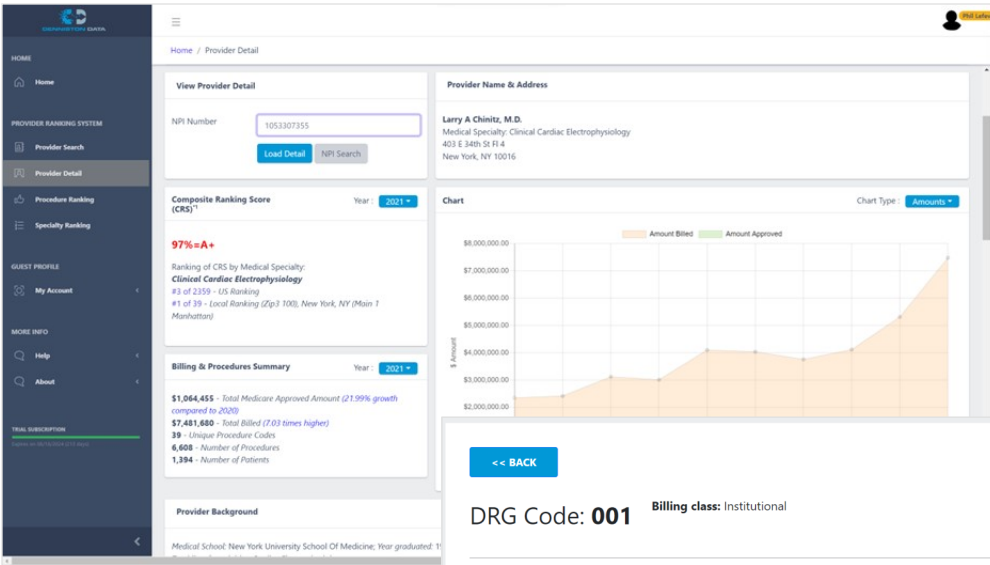

## Help members find the best doctors & specialists

Data-driven local ranking offers targeted provider lists to optimize health outcomes, cost efficiency and manage referrals. Build or integrate your network to help members find your best doctors.

## Benchmark & negotiate prices or demonstrate value

Revealing massive variability in prices by procedure across different payers and providers, with options to drill down by location, plan, or NPI. Set and negotiate prices in fee-for-service or value-based care.

Lifting the curtain over healthcare cost and quality.

Improving healthcare outcomes and saving money.
